Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-50, drawn to an eye wash station, classified in class 4, subclass 620.
- II. Claims 51-67, drawn to a dispensing kit, classified in class 222, subclass 80.
- III. Claims 68-77, drawn to an eyewash bag, classified in class 222, subclass 206.

The inventions are independent or distinct, each from the other because:

Inventions I and II,III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the particular structure recited in claims 51 and 68 is not relied upon for patentability in claims 1 and 26. The subcombinations have separate utility such as without a housing having a tray.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The

subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination III has separate utility such as dispensing medical fluid. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to divergent fields of search, restriction for examination purposes as indicated is proper.
